Project Development Phase

Performance Test & Solution Validation

Date	October 3, 2026	**Team ID**	SWTID-2026-6328
Project Name	auto ticket classification using flow designer	**Maximum Marks**	10 Marks

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Screenshot / Values & Execution Results
1	**Data Rendered**	**Table:** Custom Table 'Incident Workflow' (Label: Incident WorkFlow). **Fields Captured:** Number (Auto Number), Caller (sys_user), Category [Network, Hardware, Access, Performance], Subcategory [Wi-Fi, Projector, Forgot Password, Slow Computer], Short Description, Description, State [New, In progress, On hold, Resolved, Closed], Assigned Group (sys_user_group), Assigned to (sys_user).
2	**Data Preprocessing**	**Dependent Choice Field Configuration:** Advanced dictionary configuration enabled on Subcategory field with 'Use dependent field = true' dependent on Category. **Mapping Setup:** Wi-Fi -> Network, Projector -> Hardware, Forgot password -> Access, Slow computer -> Performance. **Data Normalization:** Standardized values captured automatically without manual entry error.
3	**Utilization of Filters**	**Flow Designer Trigger Filter:** Triggered on Record Created on 'Incident Workflow' table when condition 'Category is Empty' is met. **Keyword Logic Conditions:** • *If:* Short Description contains 'Wi-Fi' or 'Network' -> Category: Network, Subcategory: Wi-Fi. • *Else If:* Short Description contains 'Projector' or 'Hardware' -> Category: Hardware, Subcategory: Projector. • *Else If:* Short Description contains 'Forgot password' -> Category: Access, Subcategory: Forgot Password. • *Else If:* Short Description contains 'Slow Computer' -> Category: Performance, Subcategory: Slow computer.
4	**Calculation fields Used**	**Flow Data Pills & Auto Actions:** • Data Pill picker drag-and-drop used to evaluate Short Description. • Update Record action sets Category and Subcategory fields automatically. • Send Email Action dynamically addresses 'Caller -> Email' with subject 'Your Request for the issue has been submitted' and confirmation body.
5	**Dashboard design**	**Form & Workflow Layout (No. of Visualizations / Forms: 2):** • Form Designer layout configured for custom 'Incident Workflow' record view. • Flow Designer visual workflow canvas configured with trigger, branching conditions, update actions, and email notification block.
6	**Story Design**	**End-to-End Validation Scenarios (No. of Executed Test Scenarios: 2):** • **Test Scenario 1:** Caller enters Short Description: 'WiFi not working in library'. Form saved & reloaded -> Auto fills Category = Network, Subcategory = WiFi, Email dispatched. • **Test Scenario 2:** Caller enters Short Description: 'Projector not turning on'. Form saved & reloaded -> Auto fills Category = Hardware, Subcategory = Projector, Email dispatched. • **Email Log Verification:** System Logs -> Emails preview verified successfully.

Deployment Status: Project Update Set marked as 'Complete' and exported to XML format for cross-instance migration.
