Project Development Phase
Model Performance Test

Date	03 October 2026
Team ID	SWTID-2026-6328
Project Name	Auto Ticket Classification Flow
Maximum Marks	4 Marks

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Values	Screenshot
1.	Model Summary	Text classification model that reads a new ticket's short description and description, and predicts the Ticket Category (7 classes: Network / VPN, Access Management, Hardware / Laptop, Software / Application, Email / Collaboration, Password / Account, Security / Phishing). The prediction is used to route the ticket to the correct assignment group. **Model:** TF-IDF features (1–2 word n-grams) + Logistic Regression **Data:** 1,820 sample tickets, split 1,274 train / 273 validation / 273 test (70/15/15, stratified). **Note:** If the confidence score is 0.70 or higher, the ticket is classified and routed automatically. Below that, it goes to the Manual Triage queue for review.	
2.	Accuracy	**Training Accuracy:** 100.00% **Validation Accuracy:** 99.63% **Test Accuracy:** 100.00% **Precision / Recall / F1 (weighted, test set):** 1.000 / 1.000 / 1.000 **Note:** These figures come from a prototype trained on a sample ticket dataset created for this project. The sample tickets are short and clearly worded, so scores are very high. Re-run on real ticket history before reporting final results.	

S.No.	Parameter	Values	Screenshot
3.	Confidence Score (Only Yolo Projects)	**Class Detected:** Category predicted for the ticket, for example Network / VPN, or Access Management. **Confidence Score:** Probability the model gives to the predicted class. For example, 0.98 means the model is 98% sure the ticket is Network / VPN. **Threshold:** 0.70. On the test set, 99.3% of tickets scored at or above it (accuracy 100.0%) and 0.7% went to Manual Triage. Mean confidence: 0.93. **Note:** YOLO applies to object-detection projects only. This is a text classification flow, so the class probability is used as the confidence score. Vague tickets such as “it is not working” score low and go to Manual Triage.
